WHO AM I?

I am a 24 year old web developer with 2 years experience in the field. My main language is Javascript as well as utilising HTML and CSS, alongside that I have some knowledge of PHP, SQL, Node JS and briefly dipped my toes into some Java coding in university. Some frameworks I have worked with in my time in this profession include JQuery, Bootstrap, Angular and Express. My current company is a Google cloud partner which has enabled me to learn about the GCP technologies, mostly Firebase, Fire Store and App Engine. At university I also learned two project management methods in the forms of Scrum and Prince2.
